THE REPLY FILED 08 June 2005 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

- a) ☐ The period for reply expires _____ months from the mailing date of the final rejection.
- b) ☒ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

a club head body having a heel, a toe, a striking face, and a body axis;

a hosel including a leg portion extending from said club head body and a boss connected to said leg portion, said boss being configured to accept a shaft along a shaft axis, said shaft axis defining a lie angle with respect to said body axis; and

said leg portion configured to deform plastically toward the toe end of said club head body to allow adjustment of said lie angle, and having a predetermined forward slant angle with respect to said body axis such that said leg portion remains concealed, when said club head body is oriented so that said body axis is substantially parallel to a playing surface and viewed from directly above said club head body, within a range of adjustment of said lie angle.

2. (Original) The putter club head of claim 1, wherein said predetermined forward slant angle is between approximately 1.0 degrees and 6.0 degrees.

8. (Currently Amended) A method of customizing a golf putter comprising the steps of:

providing a golf club head including a club head body having a heel, a toe, a striking face, and a body axis, a hosel including a leg portion extending from said club head body and a boss connected to said leg portion, said boss being configured to accept a shaft along a shaft axis, wherein said shaft axis defines a lie angle with respect to said body axis, and wherein said leg portion has a predetermined forward slant angle with respect to said body axis;

determining a target lie angle; and

adjusting said lie angle to said target lie angle by plastically deforming said leg portion toward the toe end of said club head body such that said leg portion remains concealed, when said club head body is oriented so that said body axis is substantially parallel to a playing surface and viewed from directly above said club head body, within a range of adjustment of said lie angle.

9. (Previously Presented) The method of claim 8, wherein said providing step includes providing a leg portion having a predetermined forward slant angle between approximately 1.0 degrees and 6.0 degrees.

10. (Previously Presented) The method of claim 9, wherein said providing step includes providing a leg portion having a predetermined forward slant angle between approximately 1.5 degrees and 2.5 degrees.
